ANNOUNCEMENT

We would like to welcome Christopher Curlew to the Hunter Panels Technical and Tapered Department as a Tapered Estimator/Designer. Chris comes to Hunter with a full commercial roofing background. He spent 7 years installing low slope single ply commercial roofing systems as well as 5 years as a commercial roofing project manager. Chris is a Maine native, went to University of Maine at Orono where he graduated with a degree in Construction Management. He has lived in Maine his whole life and would love to call himself an avid Maine fisherman but can’t since he has only caught one fish – the smallest fish at the fishing derby. Chris refers to himself as a computer geek – loves to play the Star Wars version of Dungeons and Dragons and many other computer games. Chris and his girlfriend are the proud parents of a pug named Cole.

Chris can be reached at 888-746-1114 ext 6356, Direct Line: 207-228-6356
Christopher.Curlew@hpanels.com

Please help me in welcoming Chris to the Hunter team!

Jason Greenleaf
Hunter Technical & Tapered Design Manager
