**Thin Brick, Cultured Stone** — Set in thin set adhesive and metal lath that has been tested to and passed the ASTM E119 standards or passed NFPA 285 at ¾" minimum.

**TABS Panel II System** — ½" thick bricks using TABS Wall Adhesive. Glen Gery - Thin Tech Elite.

**Limestone or Natural Stone** — Minimum 1.25" thick, Limestone or Natural Stone Veneer. Any standard non-open joint installation technique can be used.

**Stone Aluminum** — Stone Aluminum Honeycomb Composite Panels that have been successfully tested by the panel manufacturer via the NFPA 285 test method. Any standard installation technique can be used.

**Cast Artificial Stone** — Minimum 1½" thick complying with ICC-ES AC51. Any non-open joint installation technique such as shiplap may be used.

**Fiber Cement Porcelain, Ceramic Tile** — Minimum ¼" thickness. Any standard installation technique can be used.

**Terra Cotta Cladding** — Use any Terra Cotta Cladding System in which Terra Cotta is minimum ½". Any non-open joint installation technique or ventilated shiplap may be used.

**Autoclaved Aerated Concrete** — AAC panels that have successfully passed NFPA 285 criteria.

**Metal Exterior** — Metal Exterior wall coverings such as Steel, Aluminum, Copper and Zinc (Zinc with Class A only). Any standard installation technique can be used.

**MCM System** — Use any Metal Composite Material system that has been successfully tested by the panel manufacturer via the NFPA 285 test method. Any standard installation technique can be used.

**Stucco** — Minimum ½" thick, Exterior Cement Plaster and Lath.

**HPL** — FunderMax m.look minimum ¼" thick using any standard installation technique.

### III MATERIAL OPTIONS
